

COGSDALE

FOCUS is a stable, proven, and intuitive software suite for utilities. We **EMPOWER** our clients' staff while providing enhanced services to their customers with a future-proofed, cost effective solution.

We **TRANSFORM** organizations through automation and real-time integration with a solution that **SUSTAINS** operations over time, at a low 10 year Total Cost of Ownership.

Most organizations are not aware of the **INSIGHT** gained by integrating workflow across multiple systems and having an end to end view of operations. The **FOCUS** that our offering brings to internal and external clients improves communication, allowing for an improved customer experience.

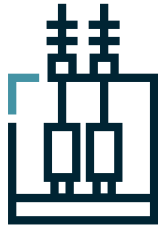

Cogsdale provides clarity to clients by providing industry best practices and real, relevant information in an integrated solution.
